

## BIM24400BCS

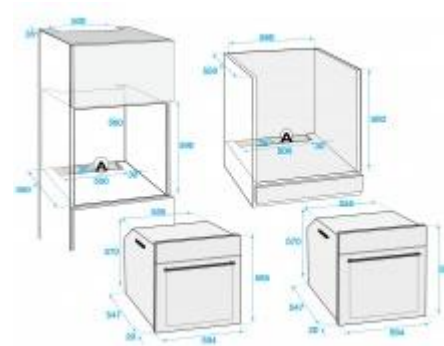

### Overview:

12 Functions  
71lt Cavity Capacity  
Multifunction Built In Oven  
Black Glass  
Graphical LED display:  
Digital Interactive Programmer  
Touch Control Commands  
Energy Class: A+  
Triple Removable Inner Door Glass  
Timer  
Soft Close  
5 Levels Removable Racks

### Functions:

- 3D Cooking
  - Top and Bottom Heating
  - Booster
  - Defrost
  - Full Grill
  - Conventional Cooking
  - Slow Cooking
  - Fan Assisted
  - Bottom Heating
  - Grill Ventilated
  - Low Grill
- Warm Keeping

### Dimensions

Height: 59.5 cm

Width: 59.4 cm

Depth: 56.7 cm

The dimensions of the cavity :59x56x55 cm

### Energy Class A +

Products Beko having the energy class A + does not only contribute to improve his family budget, but also care about the environment. Models with class A + consume even less energy than the same models in class A.

### Baking and hot air

Thanks to the simultaneous operation of the upper and lower heater and the hot air it is possible to faster burning! Ideal for preparing for example biscuits!

### Telescopic

guides ensure that the telescope can be safely and easily eject the tray of hot dish, avoiding accidental burns.

### Door full glass

oven door on both the outside and inside are made with a full glass and stripped screws and folds for easy cleaning. In some models, you can remove the inner glass in order to thoroughly wash.

### Booster

rapid heating Booster is a feature that greatly facilitates burning. When enabled, the oven uses all the available heat source, to quickly reach the desired temperature, then returns to the preset mode baking. With this feature, you do not need to worry that we forgot early preheat the oven

### 3D Baking

Baking 3D is a new generation of baking, which activates all heating elements and operates multi-dimensionally. Lower and upper heater, heater oval in conjunction with the fan operate sequentially for the even distribution of heat throughout the interior. Baking 3D also allows you to bake several dishes at the same time.

### Thawing

Using the convection also allows for quick defrosting frozen foods guaranteeing effect within a few minutes!

### Traditional baking

top and bottom heater warms the food while working. This is ideal for baking cakes, meats and any dishes when we want to get a crispy top.

### The Slow Cooking

Preparing a delicious meal requires patience. The SlowCooking slows the rate of baking to preserve juiciness, flavor and taste of the dish and its nutritional value. For a crispy crust, you can change the end of cooking function for Mini Grill.

### Soft closing doors

Thanks to special hinges, doors, selected Beko oven closes gently, quietly and in a convenient way.

### Grill

This option is ideal for grilling meat, sausages, toast or fish.
