### Automatic tablet optimization

If you are a fan of practical tablet detergent, but hate partially cleaned and partially washed dishes, you'll love the ability to automatically optimize your tablet in Beko dishwashers. The built-in intelligent sensor decides what is needed for the best drying results, determining how long your pots, pans, and glasses need to be dried to achieve glorious results. No matter what detergent you are using, your smart machine will know what to do. Well done.

### LEDspot™

Your Beko dishwasher can be so quiet that you are not sure whether it is turned on or not. Is the pottery opener? By constantly checking, you can lose a lot of time. With Beko LEDSpot™ technology this will no longer happen. Thanks to the red light indicator on the floor at the foot of the device, you can simply take a look and see if it works or not. This way you can let the dishwasher quietly keep working, just like you do.

### GlassShield Gentle Washing System

One of the leading and most advanced features of Beko dishwashers is GlassShield technology, designed with glass in mind. Given their fragility, we have developed a technology that not only effectively protects all glassware, but also extends their export time by 20 times ..
