

HII 64500 FHTW

Induction cooker

The latest and most efficient cooking technology: Induction cookers are only heated when a pot is placed on the stove. And also only where he stands. This automatically detects the magnetic field. Beneath the glass field is a coil that generates a magnetic field. If a pot is placed on the cooking zone, the heat is generated directly in the cookware. This saves energy and conserves resources. Burnt fingers are a thing of the past.

Slide Touch sensor buttons

The new SlideTouch sensors are in the trend: by tapping directly or by moving along the operating scale, the individual cooking zones are controlled precisely. There are 19 cooking stages for each cooking zone. The selected cooking level is shown in the display. Especially useful is the Stop & Go button for short interruptions. This means you are always on the safe side. The cooking time can be set with the timer: the cooking zone switches off automatically and the cooking time is signaled.

HII 64500 FHTW

Energy

Left in the front

180 mm - 1800 W / 2500 W (booster)

Back left

180 mm - 1800 W / 2500 W (booster)

Front right

145 mm - 1400 W / 1800 W (booster)

Back right

210 mm - 2200 W / 3200 W (booster)

Overview :

- Efficient and Fast Cooking
- * Color: White
- Easy Wipe Clean
- 4 Zone with 1 Flexi Zone
- Frameless Sleek Look
- Slide adjustable power levels per zone
- Individual Timer
- On and off indicator light

Safety features

- Child lock
- Timer and buzzer
- Residual heat indicator
- Overflow safety
- Automatic shut-off
- Overheat safety system

Technical specifications

Frequency : 50(Hz)

Voltage : 230-400 V

Max. Current: 40 (A)

Power consumption : 7200(W)

Measurements and weight

Height : 5.5(cm)

Width : 58.0(cm)

Depth : 51.0(cm)

Weight : 9.3(kg)
