

Key Features

Induction Ceramic Glass
Hob on indicator and Residual heat indicator
Built In Electric Hob

Burners/Heating zones

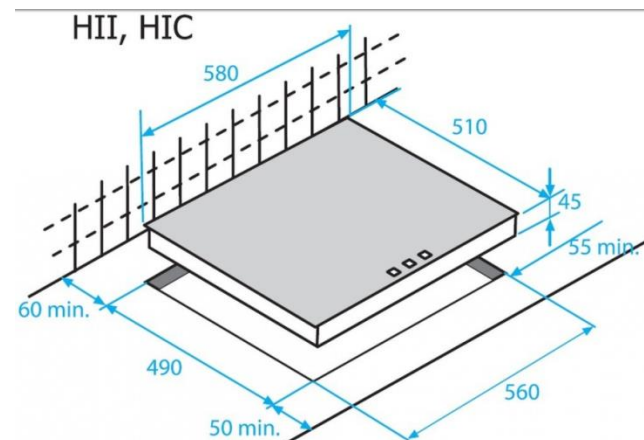

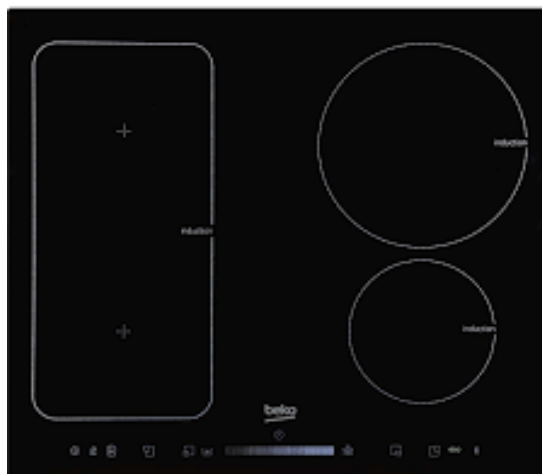

4 x Burners/Heating zones
Front left: 2 (kW)
Rear left: 2 (kW)
Front right: 1.6 (kW)
Rear right: 2 (kW)
Front left Rapidlite/Booster: 2.3 (kW)
Front right Rapidlite/Booster: 1.8 (kW)
Rear left Rapidlite/Booster: 2.3 (kW)
Rear right Rapidlite/Booster: 2.3 (kW)

Hob Controls

Timer
Front control
Touch Control

Dimensions

Height: 10cm
Width: 58cm
Depth: 51cm
Weight: 13.4kg

Price: €719.00

Offer Price: €679.00

Warranty: 3 Years on Parts & Labour

Induction heating technology

Cleverly recognises the size of your pots and pans and saves you money on energy and bills. No heat or energy is wasted.

Flexible induction zones

Flexible induction zones offer the advantage of combining two hob zones into one using the Touchslider control.

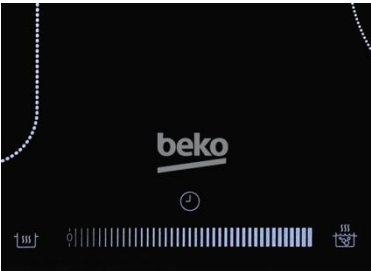

Easy to clean induction hob

Spillages from pans won't stick to the hob surface. Due to an induction hob's electromagnetic cooking technology.

Maximum safety induction hob

Only the pan is heated up and hob turnsoff automatically when a pan is taken off. The possibility of accidents occurring is reduced.

Touchslide control

Change the settings on your hob. With one slide of a finger change your hob from keeping something warm to the Booster setting.

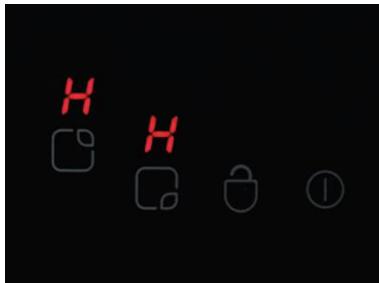

19 levels power zone

With 19 adjustable power levels per zone, you can cook your favourite meals without hassle or worry.

Booster function

Cleverly boils on a built in induction hob, allowing each cooking zone to cook on maximum power then return to normal heat once boiled

Heat indicators

For added safety, the heat indicators will display a visible 'H' to warn you if the hob has not cooled down enough reducing domestic accidents.
