

**A++** - The need to save energy and resources has never been more important than now. Beko, with its vision of the environment, offering products with an A ++ energy level.

### LED lighting

Compared with conventional lighting designs, succession of LED lights on the back wall of the refrigerator compartment provides more efficient lighting and visibility.

### Specifications

Energy Efficiency Class: A++  
 Color: Stainless Steel  
 Neo Frost-Full Frost Free  
 Active Ioniser  
 Door Open Alarm  
 Noise Level: 43dBA  
 Reversible Doors

### Refrigerator

Net Volume: 372Litres  
 4 x Safety Glass Shelves  
 4 x Door Shelves  
 Stainless Steel Wine Rack  
 0°C Compartment  
 Interior LED Light  
 Fruit & Vegetable Drawer

### Freezer

Net Volume: 103Litres  
 Freezing Capacity: 6Kg/24Hours  
 Interior Light  
 Twist & Serve Ice Cube Tray

### Dimensions

Height: 193cm  
 Width: 70cm  
 Depth: 69cm  
 Weight: 85Kg

**Guarantee: 5 Years on  
 Parts & Labour**

**Active Odour Filter** - Filters the cold air that circulates in the refrigerator and eliminates unwanted odors and bacteria, helping to keep food fresh and healthy.

**Active Ioniser** - The active ionizer creates an antibacterial effect that neutralizes bacteria, viruses and particles in the fridge. As a result, the air inside the refrigerator is kept in clean, food can be stored for a longer period.

**Neo Frost** - Refrigerator and freezer require different temperatures and humidity: the humidity in the refrigerator is essential for preserving fruits and vegetables, but it can have negative effects for the freezer. The Neo Frost system maintains separate Active Beko temperatures and levels of humidity for optimum storage of food.
