

General Specifications:

- A+++ -10%
- Colour : White with chrome colour door
- 11 Kilo Load
- ProSmart Inverter Motor
- LCD Display
- Large 180° door-opening
- 24 hour Delay Timer
- Anti crease function
- Automatic Half Load
- Ecological valve - 100% exploitation of detergent
- Child Lock Feature
- Variable Temperature Selection
- Variable Spin 600 rpm to 1400 rpm

16 Variable washing programmes:

Cotton, Cotton Economic, Babycare, Daily Quick Wash, Synthetic, Shirts, Silk, Spinning, Rinse, Woolens, Bedding, Dark Care, Special fast program, Hand Wash, Steam Program, Waterproof Care

Auxiliary Functions:

Express, Prewash, Night Mode, Anti-Creasing, Rinse Plus, Rinse Hold

Dimensions:

85cms x 60cms x 60cms
 (Height x Width x Depth)

Guarantee: 5 Years on Parts & Labor
 2 Years on Cross & Bearings

ProSmart™ Inverted Motor

Beko washing machines with ProSmart inverter technology clean even the toughest stains-with less noise, up to 70% more energy saving in comparison to A+++ energy rating and higher durability.

Hi-tech Heater™

The Heating Element is an essential component of a washing machine. The new Beko heating element incorporates a state-of-the-art nickel metal surface coating technology resulting in 50% less surface roughness, ensures perfect corrosion protection, and reduces lime-scale buildup by 40%. The Hi-tech Heater has an extended life of up to 100 times more than a standard heating element.

Aquafusion

Smart Beko washing machines help you to save detergent as well as energy and water. In regular washing machines which do not have a detergent saving system, nearly 25% of the detergent is lost during the washing process. Specially developed Aquafusion Technology featured in Beko washing machine reduces this amount to a very low level. This saves you up to 5.5 kgs of detergent every year.

Baby Protect

This specially developed antiallergenic BabyProtect program targets to provide antiallergenic laundry for your sensitive skin and for your baby. You can get maximum hygienic cleansing results by the help of additional drum movements and sensitive temperature control. Temperature is continuously maintained at a certain level throughout the wash cycle.

XL door

Selected Beko washing machines feature an extra-large 34 cm porthole. Even the bulkiest laundry - duvets, sheets, bathrobes - can be easily loaded through the extra large porthole.

Daily Quick:

The Daily Xpress program has been designed to wash slightly soiled, unstained cotton garments quickly, especially items that have been used only once, like bathrobes, duvet covers, sport wear, daily clothes, etc. Full capacity laundry can be washed 30°C in just 28 minutes. The program also allows washing in all temperatures between 0-90°C.

Delicate fabrics

Sensor controlled Beko Washing Machines feature a special care program for your delicate laundry (clothing from materials such as viscose and silk), ensuring that it is washed gently at a very low temperature.

Wool Program:

Wool program washes delicate woollens even more gently than you can by hand. This special washing cycle with its smart control will ensure that woolen garments are washed without damage. Moreover, by adjusting the optimum water level fibres will not absorb too much and become damaged and stretched.

Quick 14

Designed to wash slightly soiled, unstained and small amounts of laundry, such as socks, towels, bed sheets and t-shirts that have been used only once, this special program washes 2kg capacity load at 0-30°C in just 14 minutes.

Extra rinse

Some clothes require more care than others. Extra rinsing is provided for laundry that requires special attention like baby clothing or garments worn by people that are allergic to detergent chemicals. This function protects sensitive skin by washing off any leftover detergent.

Hand wash

This program enables you to safely wash delicate hand-wash fabrics such as silk and cashmere. It creates a particularly gentle wash action, so the agitation is minimized to avoid shrinkage. The program also uses less water, thus preventing excess absorption by the fibers on fabric. Which can often result in clothes stretching or being damaged.
